

**tec**  
Get Connected

## Air Conditioning

As we are often used by clients to install both power and data, it was a natural progression for us to add additional products to our onsite installation services. Air conditioning is one of our fastest growing sectors.

Partnering with Evolve allows us to deliver the highest quality products and installations.

Clients have found that there is a significant saving to be made by using us for multi products by sharing resources.

# Air Conditioning

It's our experience that new build or office refurbishment projects can be a moving target with omissions, additions and sudden changes to plans. We have extensive experience on power, data and air conditioning installations.

We pride ourselves on working effectively with clients to minimise disruption and costly mistakes, by offering the best advice prior to project commencement.

Our consultative and honest approach to projects is respected by our clients. We make it our business to work hard for you and continue to give you the best advice and support post install.

Make it our problem not yours.

- Commercial and domestic air condition installations
- Power and data installations
- Project management and design
- Gas certified engineers
- Installation certificates
- Servicing and maintenance plans
- Professional service
- Savings for multi service projects
- Fully trained engineers
- ISO 9001 quality assured

## Cost effective Internet, Colocation, Audio Visual, Wireless, Data Cabling and Infrastructure Solutions

If you want friendly help and advice on the best way to incorporate the highest quality and cost effective Internet, Audio Visual and Data Cabling Solutions into your business, contact our personable team of experts today.

## Audio Visual

tec Get Connected are a little bit different from a conventional Audio Visual Installer. We have evolved into the AV marketplace driven from an IT background. Because of this, we have a greater understanding of the IT aspect now required in every AV installation.

# Audio Visual

An Audio Visual Solution used to be just a projector capable of displaying images to a screen coupled with speakers. Nowadays, LED screens with interactivity and projectors can be connected into a network and come with multiple functionalities. In the current climate, end users are looking for the best value in any AV solution to maximise performance and improve reliability whilst remaining within budget.

Because **tec** Get Connected do not use subcontractors for any aspect of our work, we maintain full control over all installations and can normally add in functionality and services that are not offered by our competitors. We are capable of supplying a single projector or screen to a comprehensive integrated IT and AV solution.

- Projectors
- LCD and LED Screens
- Interactivity
- Audio Solutions
- Wireless Screen Connectivity
- Video Conferencing
- Meeting Room Management Systems
- Room Design Service
- ISO 9001 quality assured

## **Business Internet**

As every day business function is becoming more dependent on the internet, the need for reliable and high speed connectivity continues to grow.

Because of this, telecom carriers continue to develop new technologies capable of delivering faster, more reliable services. But which one is right for you?

**Connecting Business Together**

# Business Internet

**tec** Get Connected provide fast and reliable Business Internet Connectivity and Multi-Site Services. Our consultative approach and extensive industry knowledge is key to our success. Our focus is on both service delivery and ongoing support ensuring that your connections are covered.

Our approach is to work with our customers to understand their needs and propose the right service at the right price. Our consultants have many years of experience in the connectivity industry and our policy is to provide, deliver and support the best solutions available.

- Business Internet
- Fibre to the Cabinet
- Ethernet First Mile
- Fibre Leased Line
- Point to Point
- MPLS/WAN
- Wireless Internet
- Wireless Point to Point

If you want friendly help and advice on the best way to incorporate the highest quality and cost effective Internet, Audio Visual and Data Cabling Solutions into your business, contact our personable team of experts today.

**tec Get Connected have vast experience in the installation of data cables.**

**As most CCTV systems are now run over a network infrastructure, we have all the necessary equipment and experience to assist in providing the highest quality CCTV installations and hardware.**

**We are an Axis approved partner which means that all our engineers are fully trained to install CCTV systems to a standard that meets with all our customers' requirements.**

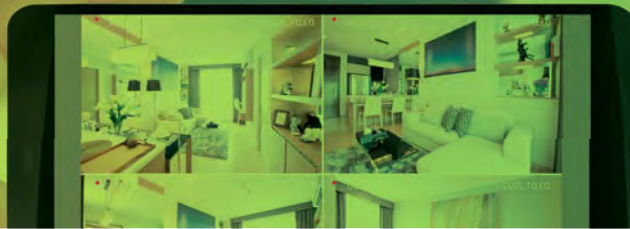

**If you have a requirement for a new system or are considering an upgrade, we are able to help.**

**Connecting Business Together**

## CCTV

tec Get Connected pride ourselves on the quality and reliability of all CCTV systems we install.

We started installing traditional analogue system over a coax backbone to a DVR where all files are saved/stored locally. However, Axis have redefined the CCTV industry. They have incorporated the world of CCTV and Door Access under one IP driven solution.

The wide range of products that Axis has to offer have allowed us to tailor solutions for all our clients, suiting different budgets for many businesses. This ranges from small retail premises and buildings to large offices & busy/dusty warehouses.

tec Get Connected have a solution for all requirements.

- Installation of CCTV cabling and cameras
- CCTV recording planning, design and installation
- Axis authorised partner
- Professional advice and service
- Quality & reliable systems for all budgets
- System warranty and support

# Data Cabling Audit

**Having problems with existing data cabling or just want to know what you are moving into?**

Our Data Cabling Audit is a great way to gain piece of mind when you are having problems with existing or moving to new structured cabling for either voice or data.

Prices  
starting from:  
**£575.00**

For a Half Day Audit

# Data Cabling Audit

tec Get Connected offer a half day or a full day Cabling Audit

**● Half day Cabling Audit includes:**

- 2 engineers onsite for 4 hours
- Full testing of up to 50 data points
- Immediate verbal report on any problems
- Data point locations/numbers documented on pre-provided floor plans\*
- Re-labelling and re-termination of any faulty points\*\*
- Replacement of up to 10 faulty data modules \*\*
- Full test results provided in the Audit Report
- Summary of any required repairs/recommendations

**Cost for a half day Cabling Audit from: £575.00**

**● FULL DAY Audit includes:**

- 2 engineers on site for 8 hours
- Full testing of up to 100 data points
- Immediate verbal report on any problems
- Data point locations/numbers documented on pre-provided floor plans\*
- Re labelling and re termination of any faulty points\*\*
- Replacement of up to 25 faulty data modules \*\*
- Full test results provided in the Audit Report
- Summary of any required repairs/recommendations

**Cost for a Full day Cabling Audit from: £895.00**

If you require an electronic floor plan diagram, this can be created at an extra cost.

Prices vary based on how many floors/diagrams are required.

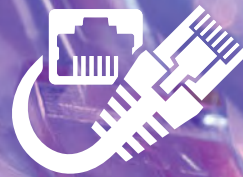

**Cost for drawings from £275.00 • Additional data point installation from £45.00**

\*floor plan must be provided. \*\* subject to the audit time limitations

## Cost effective Internet, Colocation, Audio Visual, Wireless, Data Cabling and Infrastructure Solutions

If you want friendly help and advice on the best way to incorporate the highest quality and cost effective Internet, Audio Visual and Data Cabling Solutions into your business, contact our personable team of experts today.

## Data Cabling

Hampshire based tec Get Connected have extensive experience in all aspects of Data and Voice Cabling. We have been installing Category 5e and Category 6 Data Cabling as well as Fibre Optic and Voice Cabling nationwide for over 15 years.

We are capable of installing a single data point or a complete campus or corporate network. Whether you are moving into new premises or extending your existing network, tec Get Connected can provide a service to suit.

# Data Cabling

**tec** Get Connected originated from a Data and Fibre Optic Cabling background. We only use our own engineers who have extensive experience and are fully trained in all aspects of Voice, Data and Fibre Optic Cabling as well as on site Health and Safety. Data Cabling forms part of nearly every project that we undertake. Everything works on or is powered by Cat5e or Cat6 nowadays. The fact that we do not subcontract any aspect of a project allows us to remain in control of quality and delivery times.

If you have a requirement for a single data point or are looking at a complete Data Cabling upgrade please feel free to contact us and we will be happy to come to site and provide a free site survey for your Voice and Data Cabling requirements.

- Category 5e and Cat 6 cabling
- Cat 6a shielded
- Fibre Optic Cabling (single and multimode)
- Project Management and Design
- Cabling Audits
- Fully Trained Engineers
- Fault Finding and Testing
- Network Design Service
- ISO 9001 Quality Assured

**Cost effective Internet, Colocation, Audio Visual, Wireless, Data Cabling and Infrastructure Solutions**

If you want friendly help and advice on the best way to incorporate the highest quality and cost effective Internet, Audio Visual and Data Cabling Solutions into your business, contact our personable team of experts today.

## Door Entry Systems

Working onsite and with our partners, we have identified that conventional door entry systems have evolved from single connected units to more complex multi-door and networked systems.

We have been installing cabling for door entry systems since inception, so it was a natural progression for us to add door entry to our core product portfolio. Modern systems require a data network to work.

We are a Paxton partner and are fully trained for the design and implementation of anything from a single to complex multi door and multi site/location project. We are also able to offer door cameras and CCTV for added security.

# Door Entry Systems

Security and the management of personnel access is more important now than ever. Employers have a legal responsibility to protect the health and safety of their personnel. Door entry systems have evolved to allow for effective management of access and more importantly, the locations of personnel for health and safety management. This is particularly important for fire control and evacuation procedures.

Paxton are a leading UK brand that have a product for every requirement.

- Access control
- CCTV and video surveillance
- Door entry systems
- Wireless door handles

- Cabling and installations
- Surveys
- 24/7 Support
- Managed services
- Project management and design
- Fully trained engineers
- ISO 9001 Quality Assured

## Fibre Optics

tec Get Connected offer a full Fibre Installation and Repair Service. Whether single or multimode, internal or external, tec Get Connected can help.

All of our vans are equipped with full Fibre Installation Equipment including splicers and OTDR testers.

If you are considering an upgrade of old multimode fibre to singlemode, experiencing issues, or looking to expand your network, tec Get Connected are able to help.

# Fibre Optics

As cabling systems become larger and the need to transmit data at ever increasing rates becomes greater, the argument for Fibre Optic Cabling becomes more relevant.

Whether it is used as a vertical backbone or to link buildings across a campus, Fibre Optic Cabling offers a modern, cost-effective solution. Our Fibre Optic Cabling Installation portfolio includes:

- Dedicated Fibre Links
- Backbone Installation
- OTDR Testing & Fault Finding
- Fibre Repair and Replacement
- Containment Solutions
- Splicing/Polishing
- Network Design Service
- Cabling Audits

If you want friendly help and advice on the best way to incorporate the highest quality and cost effective Internet, Audio Visual and Data Cabling Solutions into your business, contact our personable team of experts today.

# IP Phones

Choosing the right phone solution for your business can be a minefield. Let us make it easy for you. Don't be misinformed or misled by pushy phone sales companies that often sell on price, leading to long contracts with minimal service guarantees and costly support. It's important that you take the correct advice before considering making the switch from an older analogue system which uses telephone lines or ISDN. Whereas a modern IP system uses the internet.

It's a fact that analogue exchanges and lines are being phased out by 2025, when they will be turned off by BT. These changes are happening now! You will have to install an on-premises internet ready or Hosted IP Phone System as this will be the only way to send and receive calls, once the lines are turned off.

Working with our partners and with GREEN CO, we can offer advice and provide a variety of future proof solutions based on your current and any ongoing requirements.

# IP Phones

A telephone system is a business lifeline. In a recent survey it was joint number one with Business Connectivity as an Essential Business Service. IP Phone Solutions must be reliable and secure. With faster and more reliable broadband now available, it's a natural progression for phone systems to be virtual and hosted over the internet.

This means that your phone system and data network are both reliant on a stable internet connection – however if the connection fails, so does your business.

Because of our partnership with GREEN CO, we always provide redundant connectivity solutions, allowing your business to keep moving.

Most packages include free calls to UK numbers and phones are provided on a monthly rental basis with 24/7 support as a managed service.

Make it our problem not yours.

- IP phone systems
- Cabling and installation
- Monthly rental packages
- 24/7 Support
- Managed services
- Project management and design
- Fully trained engineers
- ISO 9001 Quality Assured

## IT Services

We have been working with multiple IT support companies since inception. Using us as a trusted and reliable data cabling and infrastructure provider, delivering onsite services to their clients.

We are often asked if we can help with IT Services and Support. If this is a service you require, we are happy to assist and advise.

## IT Services

Whether you require some help with an IT issue, or a company that can provide on-site and remote support services, feel free to contact us and we will be happy to make a recommendation for you based on our experience with partners.

We will normally make recommendations that suit your business from more than one company, allowing you to make the best choice for your business.

## Meeting Rooms

What do you need to do and how are you going to do it? That is where we always start when planning your Board Room or Meeting Room designs.

We also aim to advise what is achievable within a budget. We have delivered simple solutions from just a projector and pull down screen with speakers to comprehensive integrated solutions that include a touch panel to manage multiple devices and Meeting Room Management Systems.

Interactivity and wireless connectivity is becoming standard in most of our Solution Designs. The ability to turn up and instantly connect to a screen with no cables is an effective way of improving your Meeting Room's popularity and efficiency.

# Meeting Rooms

**tec** Get Connected are committed to assessing every requirement in detail and offer a consultative approach to the design and deployment of each solution. From experience, we believe that there is no right or wrong way of doing things but instead we aim to provide a solution that meets the exact needs of our customers within budget.

We also advise on additional functionality that may add value to your investment in the future. As a team's confidence grows in the technology installed, they generally make use of the additional features available. All systems are delivered with handover training making sure that this is the case.

Meeting Rooms are our forte. Whether it is Audio Visual, Interactivity, Room Booking, Video Conferencing or anything else, **tec** Get Connected have a solution.

- Audio Visual
- Meeting Room Management Systems
- Video Conferencing
- Interactivity
- Touch screens
- Multi screens
- Video walls
- Design and Installation Service

## SD-WAN/MPLS WAN & Private Data Networks

We can design and implement MPLS-WAN Private Data Network solutions that deliver flexible, secure and centrally managed inter-site connectivity.

Connecting into a resilient multi-core network, managed centrally by Green Co, MPLS WAN private data networks bring the benefits of simplicity, control and significant cost savings for your business.

Connecting Business Together

# MPLS WAN & Private Data Networks

Data circuits connect into a central 'cloud' rather than to a specific site, making the network more flexible and resilient than using site-to-site leased lines or VPNs, which require expensive routers and configuration.

Our MPLS private data network can also provide 'on-net' access to our datacentres and other Green Co managed network services.

- Fully managed and secure private networks
- Wide choice of circuit connectivity options
- Highly scalable network – easily add or remove sites or circuits
- Converged network ideal for voice traffic and other business critical applications

- Datacentre via ethernet
- Internet breakout available
- Multi-node resilient core network backed by performance SLAs
- 24/7 Support

# Office Relocations

Moving office is stressful enough, without the hassle of organising every aspect of the move. To overcome this, we have built up a wide range of contacts that allow us to offer a completely managed service with regard to property moves and changes.

Whether you require some assistance with the IT and AV part of a project or a completely managed service from the design and deployment of a new work space, tec Get Connected can assist.

# Office Relocations

We can act as the main consultant or are happy to assist you with any aspect of any project from design through to delivery. **tec** Get Connected always work hard to deliver effective Project Management avoiding costly mistakes or delays. Our experience normally allows for any potential problems to be identified and dealt with prior to any project commencement. This makes a huge difference on larger projects where time is money and any mistakes can be costly.

We like a challenge and we have extensive experience in delivering complex systems effectively on budget and in time. We can deal with every aspect of a new build or office move including the following:

- Consultancy
- Design & Deployment of Workspace
- Furniture Design & Installation
- Plans & Documentation
- Partitioning and Internal Works
- Decorating
- IT & Audio Visual
- Power & Data Cabling
- Telephone & Broadband
- Property Moving Services
- Project Management

## Power

Over the years we have worked on many projects installing data cabling and working alongside third party electricians. As we have grown, we have found that clients prefer to deal with one organisation.

We are data cabling specialists and are now able to offer a full electrical service to our clients. In working with our vetted electrical partners, we have found that in doing so we are able to offer significant savings and shorten project timescales.

# Power

It's our experience that new build or office refurbishments are often a moving target with ad-hoc changes, additions, under-estimations plus the inevitable sudden changes to plans.

We have extensive experience on both power and data installations and we pride ourselves on working effectively with clients to minimise disruption and potentially costly mistakes.

Our consultative and honest approach is respected by our clients. We make it our business to work hard for you and continue to give you the best advice, making savings where possible.

Make it our problem not yours.

- Commercial power installation
- Bespoke data installations
- Fire safety advice and installations
- Certified electricians
- Electrical certificates
- Servicing and maintenance
- Professional service
- Air conditioning
- Savings for multi service projects

## Wireless Solutions & Surveys

tec Get Connected have been installing cabling and access points since inception. Now coupled with our investment in wireless survey software, it's a natural progression for us to be able to offer complete wireless solutions.

Partnering with GREEN CO and their technical team allows us to provide a complete service, from survey, through to delivery and onto our dedicated HelpDesk. This allows us to make the best recommendations for your business with a platinum level of support as standard.

# Wireless Solutions & Surveys

Our customers are telling us they are becoming increasingly reliant on a secure and reliable wireless infrastructure. The importance of getting it right is critical to business function in the modern wire free world.

In order for us to provide a solution to your requirements, we'll conduct a wireless survey, allowing us to provide site wide coverage with maximum efficiency, eliminating limited-service areas.

We partner with leading wireless manufacturers and have experience with all of our vetted vendors.

As we have 24/7 monitoring and support, we also offer managed services providing an umbrella for your investment.

If you have problems with your current network, thinking about expanding your existing solution or require a new installation, feel free to contact us and we will be glad to help.
